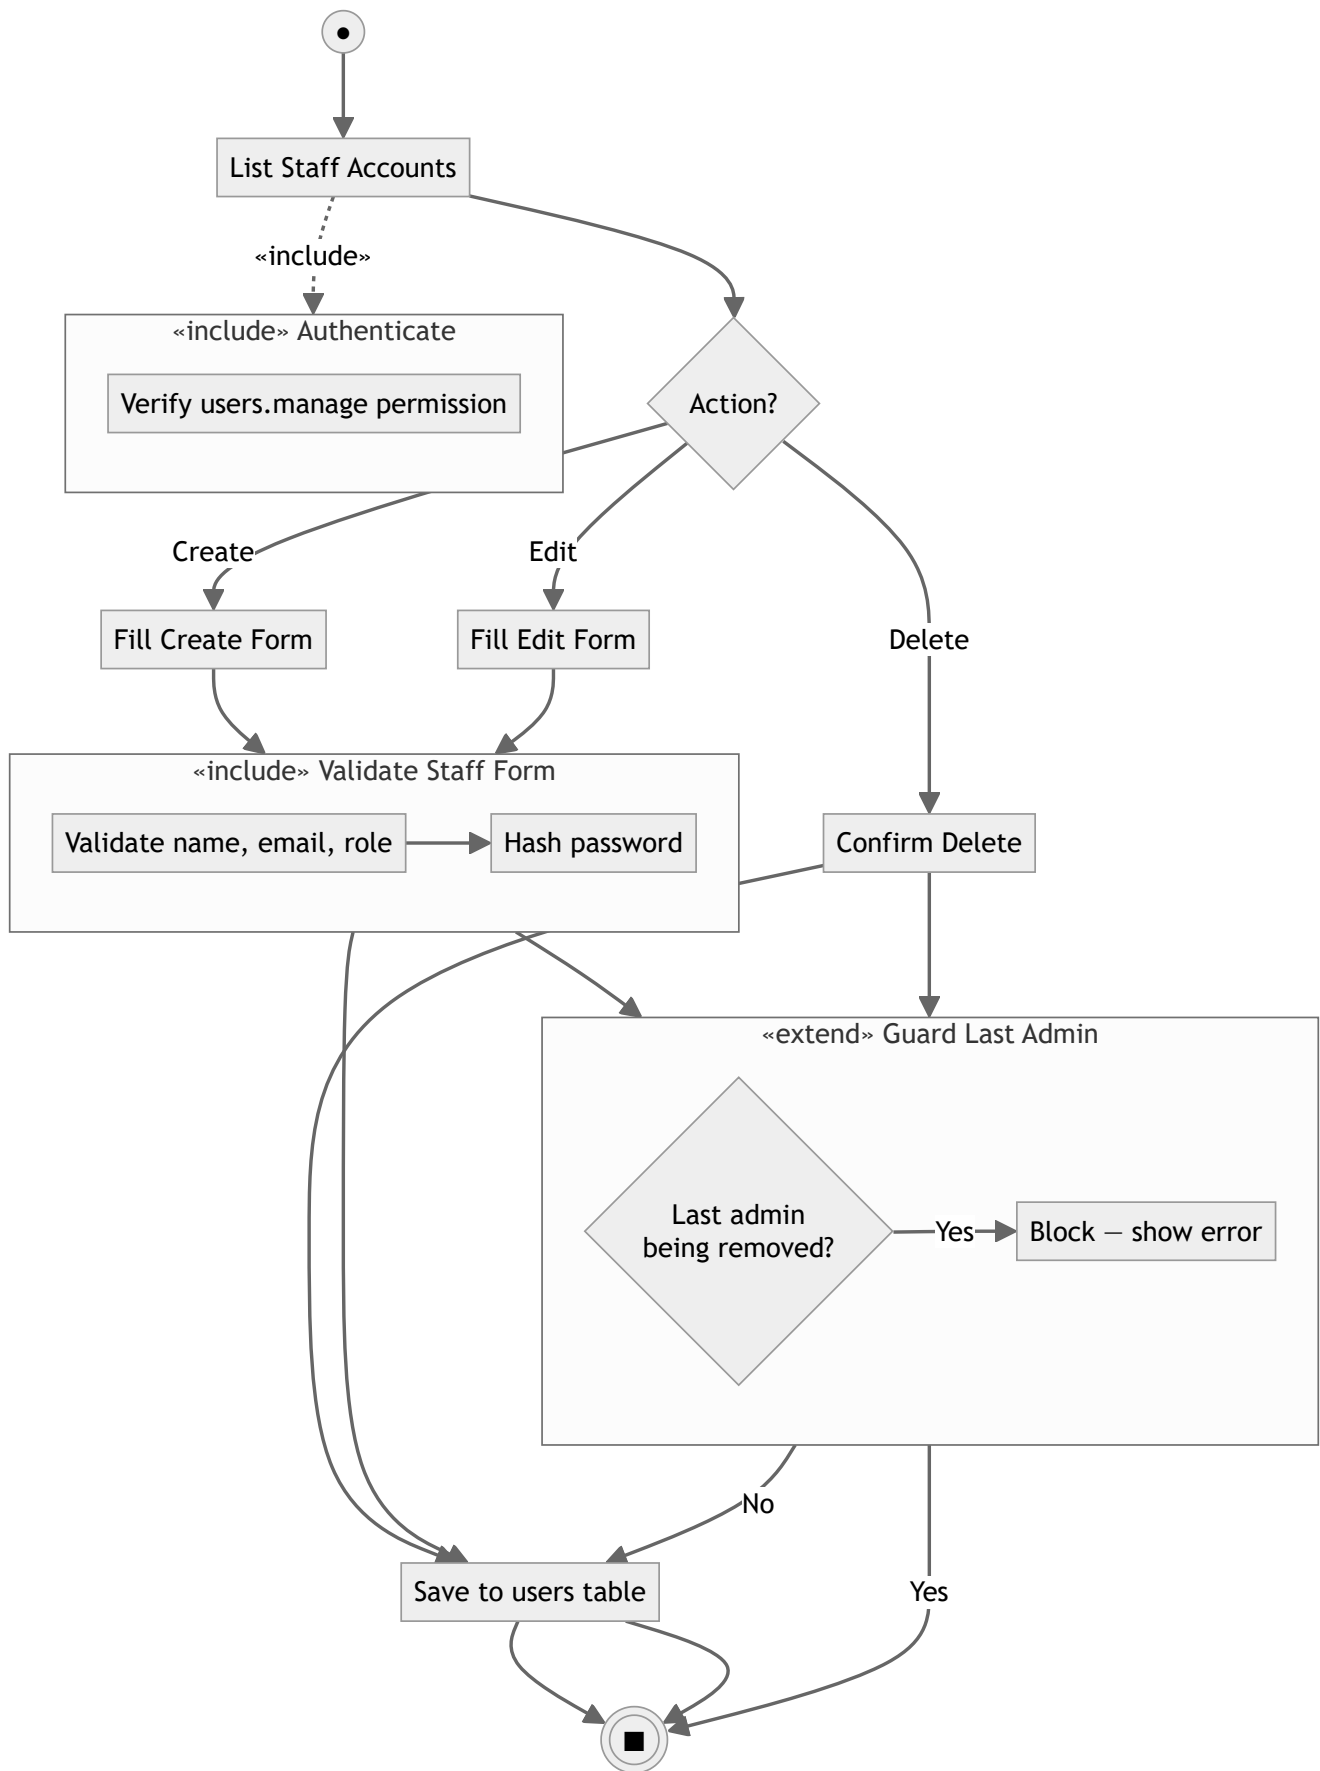

Figure 6 — Update Metal Prices

/admin/metal-prices · include: Upsert today's gold & silver rates

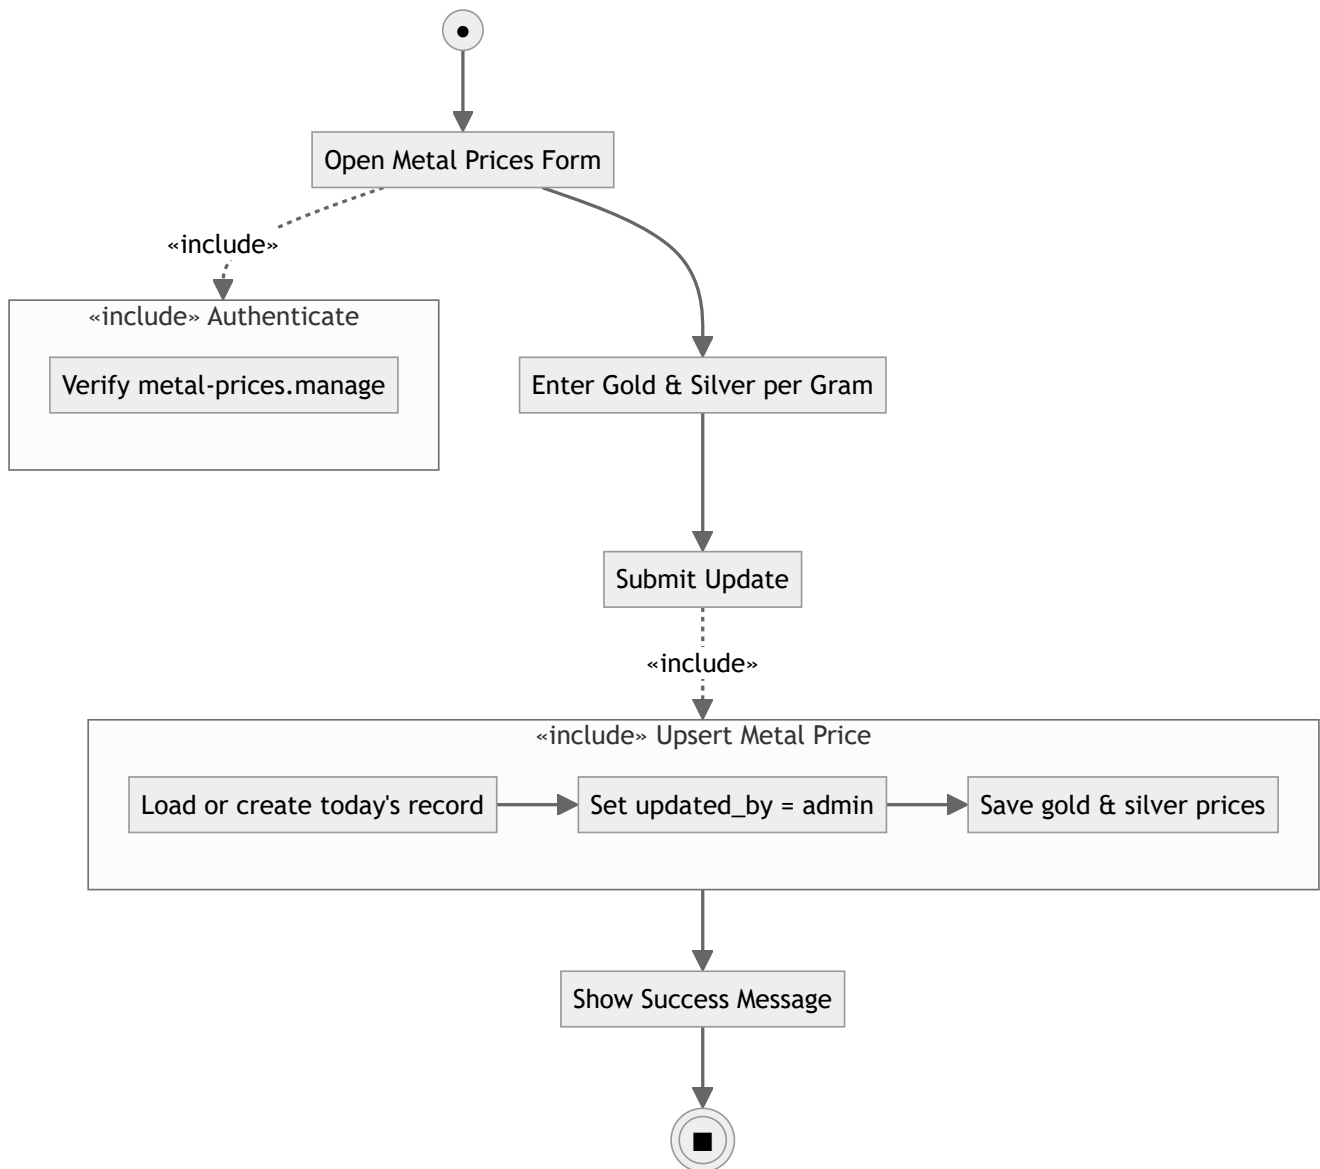

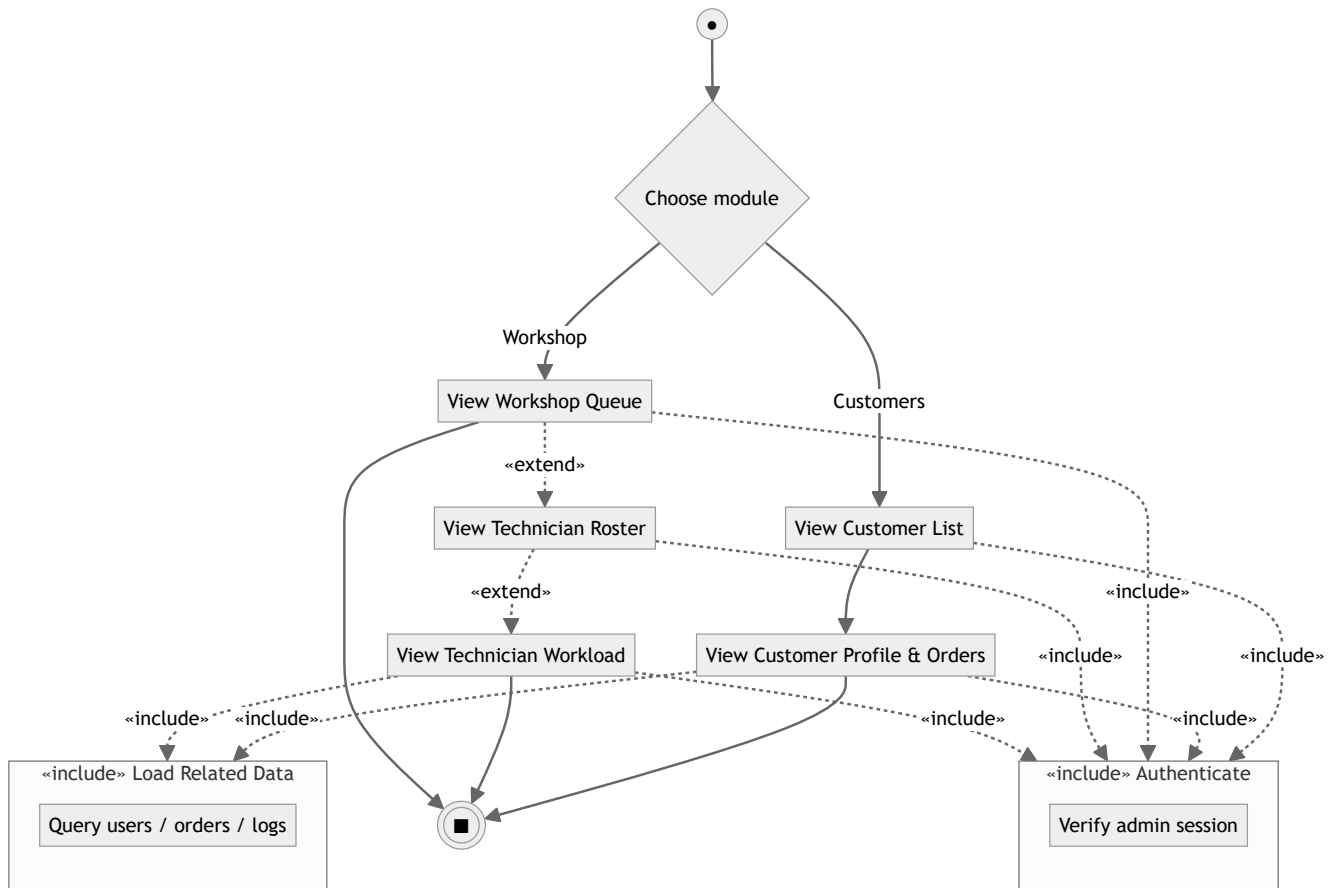

Figure 7 — View Customers & Workshop

Read-only flows · extend: roster → workload

Include & Extend Summary

Base activity	«include» (mandatory)	«extend» (conditional)
Admin session	Authenticate, Verify RBAC	—
Manage order	Authenticate, Load order data	Assign technician, Generate invoice SOON , Delivery warning
Assign technician	Authenticate, Write production log	View workshop queue first
Manage catalogue	Authenticate, Validate form	Upload images, Set availability
Manage staff	Authenticate, Validate form	Guard last admin
Update metal prices	Authenticate, Upsert price record	—
View customers / workshop	Authenticate, Load related data	Technician roster → workload

«include» = always runs as part of the base activity.

«extend» = runs only when a condition is true (e.g. order confirmed → assign technician).
